ENKO-E[®]

The economical alternative

ENKO-E®

All metal locknut

The economical alternative for the bolt/nut connection system

In addition to the high precision ENKO® locknut, for challenging applications (axle, steering, mechanism, brakes), the more cost-efficient ENKO-E® nut can be used for standard applications.

ENKO-E® stands for ECONOMIC

This all metal locknut offers the following advantages over standard locknuts

Lower manufacturing costs

Temperature resistance

Repeated application (Reusability)

No damage to bolt thread

No need for additional locking elements

Low system cost

Technical data

M18 to M42 (standard pitch)

Any wrench configuration (hexagonal, polygonal)

With and without flange

For applications with the highest requirements for security and precision we recommend our ENKO® locknut with or without spring washer.
